SUMMARY

Dynamic Software Developer with expertise in UI/UX Design, proficient in building scalable web applications. Specialized in ReactJS, Node.js, and design tools like Figma. Demonstrated ability to improve performance and usability across projects. Skilled in collaborating with cross-functional teams to drive innovation. Eager to apply expertise in full-stack development to deliver impactful digital solutions.

TECHNICAL SKILLS

- **Programming Languages:** JavaScript, Python, C, Java
- **Frontend:** HTML5, CSS3, ReactJS, Bootstrap5, Tailwind CSS, Django
- **Design Tools:** Figma
- **Database:** SQL, PostgreSQL, MongoDB
- **Backend:** Node.js, Express.js, Django, PHP
- **Version Control:** Git

EDUCATION

APJ Abdul Kalam Technological University
BTech in Computer Science and Engineering, University College of Engineering, Thodupuzha

Graduated June 2024
7.01 CGPA

WORK EXPERIENCE

- DigiStore Pay Private Limited**
Software Development Intern

July 2024 – Present

 - Engineered and enhanced web applications using ReactJS and Node.js, improving application load times by 20%.
 - Collaborated with senior developers to deploy new features, leading to a 15% increase in user satisfaction.
 - Integrated third-party APIs, boosting app functionality and cutting development time by 30%.
- Verdant IT Solutions**
ReactJS Intern

May 2023 – May 2023

 - Built responsive web applications using ReactJS, enhancing user engagement by 25%.
 - Optimized performance and fixed code bugs, reducing error rates by 10%.

ACADEMIC PROJECTS

- Phishgaurd**
Python, PHP

2024

 - Led development of a phishing and fake news detection platform using Python and PHP. Achieved a 15% increase in fake news detection accuracy.
 - Implemented NLP techniques and BiLSTM models, boosting detection performance.

PERSONAL PROJECTS

- Advanced Authentication and Authorization**
MongoDB, Express.js, React.js, Node.js

<https://advancedauthentication-mern.onrender.com/>

 - Developed and integrated JWT-based role-based authentication, reducing unauthorized access attempts by 40%.
 - Built secure email login with password reset functionality, increasing user confidence by 20%.
 - Streamlined session management using Zustand, enhancing overall app performance by 25%.
- Personal Portfolio**
ReactJS

<https://perosnal-portfolio.onrender.com/>

 - Designed and developed a responsive personal portfolio using ReactJS, showcasing projects and technical skills, resulting in a 50% increase in user interactions.
 - Optimized web performance by implementing lazy loading, code splitting, and efficient state management with Zustand, achieving Google PageSpeed scores of 90+ and improving load time by 30%.
 - Integrated analytics tracking using Google Analytics, enabling data-driven decisions that enhanced user engagement and informed design improvements.

Netflix Clone

<https://netfflixclone.onrender.com/>

ReactJS

- Developed a Netflix clone with responsive user interface, resulting in a 35% increase in user retention.
- Implemented media streaming and authentication, boosting user engagement by 40%.

MERN Stack Project: Credit-Debit System

<frontend-log-mern.onrender.com>

MongoDB, Express.js, React.js, Node.js

- Built a role-based transaction system that handled secure credit and debit functions, reducing processing errors by 15%.
- Deployed RESTful APIs with MongoDB and Express.js, improving data management efficiency by 20%.
- Enhanced authentication using JWT, contributing to a 30% improvement in user security.
